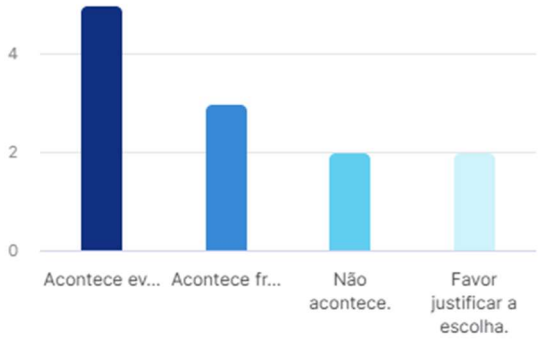
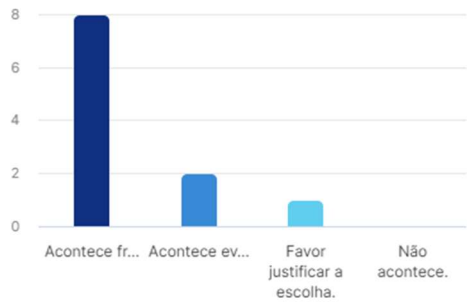
Questions related to practices that can mitigate Requirements Debts.

21. (TD) Does the company assess Technical Debt Impact and is used to paying it in the next sprint, release or versions?



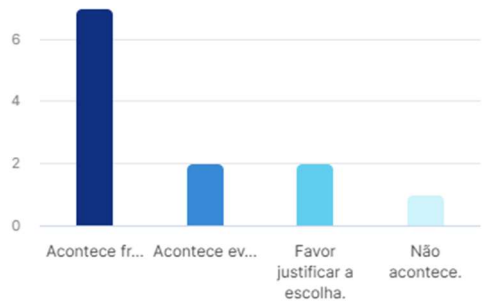
Source: Research´s Participants

22. (RE) Does the company register all requirements, demands or histories in the Backlog?



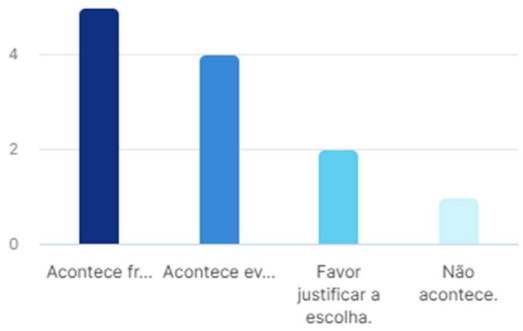
Source: Research´s Participants

23. (RE) Does the company builds the business process flow to understand the demand?



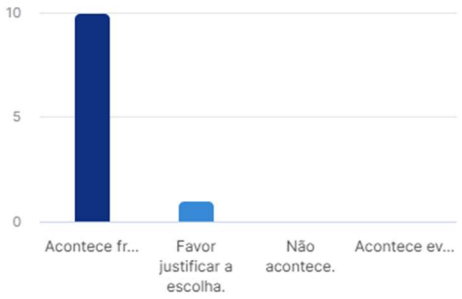
Source: Research´s Participants

24. (RE) Does the company carry out requirements surveys through multidisciplinary workshops?



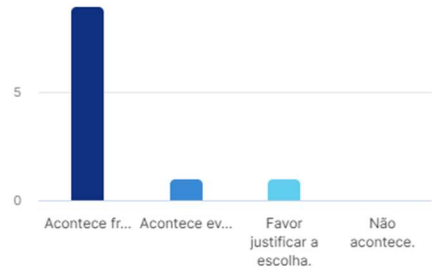
Source: Research´s Participants

25. (RA) Does the company refines requirements or demands from the sprints/releases?



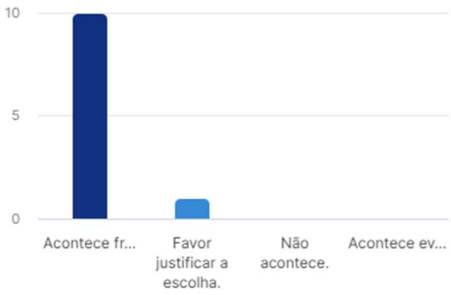
Source: Research´s Participants

26. (RA) Does the company defines and validates the priorities?



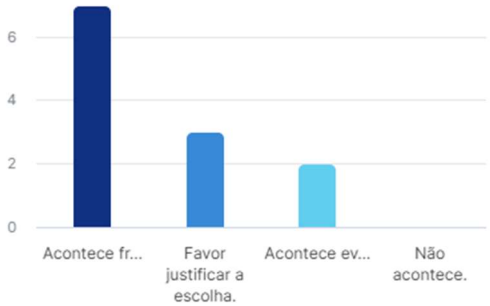
Source: Research´s Participants

27. (RA) Does the company performs ceremonies (Initial, planning, review)?



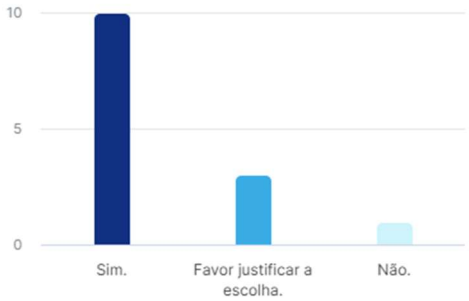
Source: Research´s Participants

28. (RA) Does the company register and classify functional and non-functional requirements?



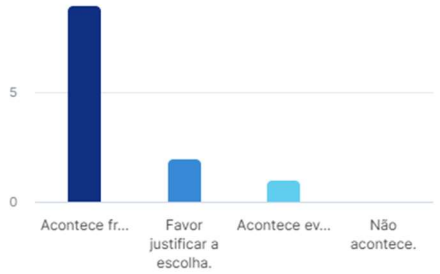
Source: Research´s Participants

29. (RA) Does the company follow a requirements process? (Sim: Yes; Não: No)



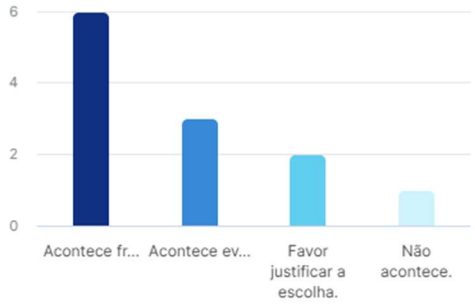
Source: Research´s Participants

30. (RSE) Does the company keep and describe clearly the requirements specifications?



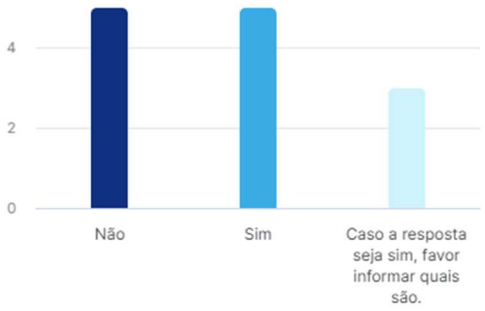
Source: Research´s Participants

31. (RSE) Does the company develop prototypes as part of the requirement specification?



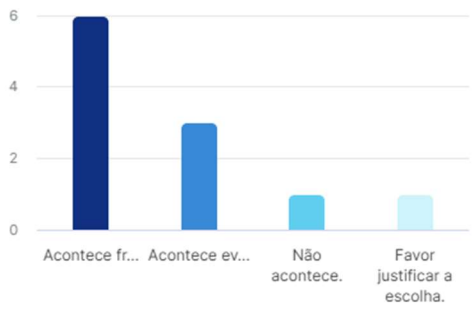
Source: Research´s Participants

32. (RSE) Does the company elaborate diagrams related to requirements specification? (Sim = Yes; (Não = No).



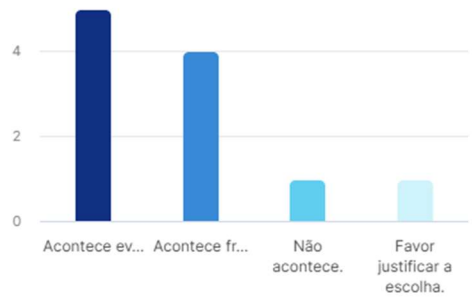
Source: Research´s Participants

33. (RV) Does the company validates the prototype with the client after the requirements specification and before developing it?



Source: Research´s Participants

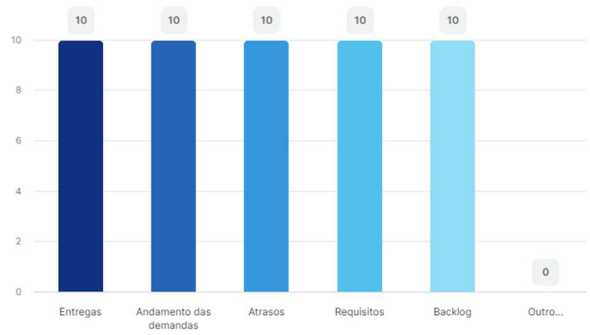
34. (RV) After developing the prototypes, does your company perform experiments or user research (usability tests) to validate them?



Source: Research´s Participants

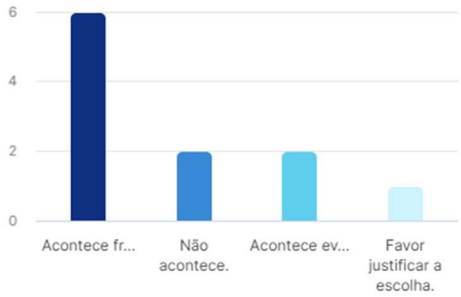
35. (RG) Your company manages:

Subtitle: Entregas: Deliveries; Andamento das demandas: Demands progress; Atrasos: Delays; Requisitos: Requirements; Backlog.



Source: Research´s Participants

36. (RG) Does the company track the requirements?



Source: Research´s Participants

37. Report the practices adopted by your company that you believe can help avoid or minimize Requirements Debt.

RESPOSTA	RESPOSTAS	RATIO
	4	40%
Validar os requisitos para a apresentação no planejamento da versão.	1	10%
Time da ouvidoria interage diretamente com os clientes para acompanhar as entregas e demandas ainda não atendidas. O feedback é repassado para o Product Owner do produto para que esteja ciente e realize o encaixe das demandas novas ou retornos nas próximas versões/sprints do produto e notificação ao cliente. Na ferramenta de help desk o cliente pode acompanhar em qual versão a demanda está prevista.	1	10%
Proximidade com o cliente e entre as pessoas envolvidas	1	10%
Criamos um modelo de processo de desenvolvimento para construir nossos produtos. Nele existem princípios, etapas e métodos bem definidos.	1	10%
